59A SAFETY ACCESSORIES

57A INTERIOR EQUIPMENT
SIDE OPENING ELEMENT MECHANISMS
Front side door lock: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a Remove:
   - the door trim (see Front side door trim: Removal - Refitting (MR 393, 72A, Side door trim),
   - the door lock barrel (see Side opening element mechanisms, Front side door lock barrel: Removal - Refitting, page 51A-4).

a Open the lock assembly access flap (1) following the marking on the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

a Remove the exterior handle (see Side opening element mechanisms, Exterior door handle: Removal - Refitting, page 51A-5).

a Drill out the rivet (2).

a Unclip the handle unit (3).

a Remove the door panel exterior handle module (4).

Tightening torques
(m) lock bolts 8 Nm

WARNING
Each time a panel is stripped in the workshop (e.g. when drilling), degrease and wipe the area and then use a fine paintbrush to apply the following anti-corrosion protection materials:
-a pre-treatment primer,
-a two-part primer,
-paint in the vehicle body colour.

-3-
SIDE OPENING ELEMENT MECHANISMS
Front side door lock: Removal - Refitting

II - OPERATION FOR REMOVAL OF PART CONCERNED

a) Remove the bolts (5).

b) Gently lift the lock to extract the retaining hook (6).

c) Remove the exterior handle lock module from the door box section.

d) Disconnect the connectors.

e) Unclip the exterior handle lock module cable.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a) Clip the lock cable to the handle module.

b) Fit the lock - module assembly into the door box section.

c) Position the lock on the door box section retaining hook (7).

d) Connect the connectors.

e) Torque tighten the lock bolts (8 Nm).
1. Clip the module on the door panel.

2. Refit:
   - the door lock barrel (see 51A, Side opening element mechanisms, Front side door lock barrel: Removal - Refitting, page 51A-4),
   - the rivet (2) (part no: 77 03 072 051),

3. Carry out a function test.

4. Close the access flap (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

5. Refit the door trim (see Front side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

Note: When refitting the exterior handle module, check that the universal joint (8) is correctly positioned in the lock.
REMOVAL

I - REMOVAL PREPARATION OPERATION
a) Unclip the lock barrel unlocking blanking piece.

II - OPERATION FOR REMOVAL OF PART CONCERNED
a) Unscrew the locking bolt completely (clockwise or anticlockwise) without removing it.

a) Remove the lock barrel.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED
a) Position the lock barrel.

a) Torque tighten (clockwise or anticlockwise) the lock barrel bolt (2 Nm).

II - FINAL OPERATION
a) Clip in the blanking piece (replace it if necessary).

a) Carry out an operational test on the lock barrel.

Tightening torques

- Lock barrel bolt: 2 Nm
SIDE OPENING ELEMENT MECHANISMS
Exterior door handle: Removal - Refitting

REMOVAL I - REMOVAL PREPARATION OPERATION

a Remove:
- the door trim (see Front side door trim: Removal - Refitting)
- the door lock barrel (see Side opening element mechanisms, Front side door lock barrel: Removal - Refitting, page 51A-4) .

a Open the access flap (1) for the exterior handle module following the marking on the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

II - OPERATION FOR REMOVAL OF PART CONCERNED

Exterior handle module (view from inside door box section).

a Lift up the panel manually (2) .

a Keep it in that position.

a Slide the lever (3) as far as possible.
Exterior door handle: Removal - Refitting

- Remove the exterior handle (5) and (4).
- Disconnect the connector (depending on equipment level).

REFITTING

I - REFITTING PREPARATIONS

- Check the presence and condition of seal (6).

II - OPERATION FOR REFITTING PART CONCERNED

- Connect the connector (according to the equipment level).
- Insert the front section and rear section of the exterior door handle.
- Push the exterior handle towards the front of the vehicle.
- Refit the lock barrel (see 51A Side opening element mechanisms, Front side door lock barrel: Removal - Refitting, page 51A-4).
- Carry out a function test.

III - FINAL OPERATION.

- Close the access flap (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
- Refit the door trim (see Front side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
SIDE OPENING ELEMENT MECHANISMS

Front side door electric window mechanism: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove the front side door trim (see Front side door trim: Removal - Refitting) (72A, Side opening elements trim).

b. Open the access flaps (1) and (2) of the window winder mechanism following the marking on the door sealing film (see Door sealing film: Removal - Refitting) (65A, Opening element sealing).

c. Remove the front side door sliding window (see 54A, Windows, Front side door sliding window: Removal - Refitting, page 54A-4) or keep it in the raised position with masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Make cuts in the sealing film to access the window winder mechanism bolts (3).

b. Unclip the window winder mechanism cable (5).

Tightening torques

- Window winder mechanism bolts: 6.5 N.m
SIDE OPENING ELEMENT MECHANISMS
Front side door electric window mechanism Removal - Refitting

REMOVAL

1. Disconnect the electric window mechanism supply connector.
2. Remove the window winder mechanism.
3. Remove bolts (3) and (4).

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

1. Refit the window winder mechanism in the door box section.
2. Connect the window winder mechanism supply connector.
4. Torque tighten the window winder mechanism bolts (6.5 N.m) following the tightening order: bolts (6), bolts (7) and bolts (8).
5. Clip on the window winder mechanism cable (5).
6. Carry out a function test.

II - FINAL OPERATION

1. Close the access flaps and the cuts in the door sealing film (see Door sealing film: Removal - Refitting) (65A, Opening element sealing).
2. Refit the front side door trim (see Front side door trim: Removal - Refitting) (72A, Side opening elements trim).
3. Initialise the window winder motor (depending on equipment level) (see Electric windows: Initialisation) (87D, Electric windows - Sunroof).

Note:
- Check for the presence of washers on the bolts (6), the bolts (7) and the bolts (8) when refitting the window winder mechanism. The presence of washers ensures correct tightening.
- When refitting the window winder mechanism, respect the tightening order. The tightening order ensures the correct alignment of the window winder mechanism and that the window is correctly positioned with the clip.
REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove the door trim (see Front side door trim: Removal - Refitting) (72A, Side opening elements trim).

b. Open the access flaps (1) and (2) of the window winder mechanism following the marking on the sealing film (see Door sealing film: Removal - Refitting) (65A, Opening element sealing).

c. Remove the sliding window (see 54A, Windows, Front side door sliding window: Removal - Refitting, page 54A-4) or secure it in the raised position using masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Make cuts in the sealing film to access the window winder mechanism bolt (3).

b. Unclip the window winder mechanism cable (4).

c. Remove:
   - the bolts (3), Tightening torques m window winder mechanism bolts 6.5 N.m

---

Tightening torques

- m window winder mechanism bolts 6.5 N.m

---

C85
SIDE OPENING ELEMENT MECHANISMS

Front side door manual window winder mechanism: Removal - Refitting

1. REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Refit:
   - the window winder mechanism in the door box section,
   - the sliding window (see 54A, Windows, page 54A-4).

a. Torque tighten the window winder mechanism bolts (6.5 N.m) following the tightening order: bolts (1), bolts (2) and bolts (3).

a. Clip on the window winder mechanism cable.

a. Carry out a function test.

II - FINAL OPERATION

a. Close the access flaps and the cuts in the sealing film (see Door sealing film: Removal - Refitting) (65A, Opening element sealing).

a. Refit the door trim (see Front side door trim: Removal - Refitting) (72A, Side opening elements trim).

Note:

Check for the presence of washers on the bolts (1), the bolts (2) and the bolts (3) when refitting the window winder mechanism.
The presence of washers ensures correct tightening.

Note:

When refitting the window winder mechanism, respect the tightening order. The tightening order ensures the correct alignment of the window winder mechanism and that the window is correctly positioned with the clip.
51A SIDE OPENING ELEMENT MECHANISMS

Rear side door lock: Removal - Refitting

B85 or K85

REMOVAL

I - REMOVAL PREPARATION OPERATION

a Remove the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

a Unclip the access blanking cover at the locking bolt of the dummy lock.

a Loosen the locking bolt completely without removing it.

a Remove the dummy lock.

a Open the access flap (1) for the lock assembly following the marking on the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

a Remove the exterior rear door handle (see 51A, Side opening element mechanisms, Exterior door handle: Removal - Refitting, page 51A-5).

a Drill the module's rivet on the door panel.

a Unclip the exterior handle module.

Tightening torques

- Lock bolts 8 Nm
- Dummy lock locking bolt 2 Nm

111804

111945

Note: Removal of the rear door exterior handle is the same as removing the front door exterior handle.

WARNING

Each time a panel is stripped in the workshop (e.g. when drilling), degrease and wipe the area and then use a fine paintbrush to apply the following:

- a pre-treatment primer,
- a two-part primer,
- paint in the vehicle body colour.

Note:

Drill the cylinder head of the lock assembly with a measuring magazine (MR 393, Door sealing) (111804).

Ensure the cylinder head is in a horizontal position.

Clean the cylinder head with a degreaser.

Lubricate the cylinder head shaft.
**Rear side door lock: Removal - Refitting**

**B85 or K85**

**II - OPERATION FOR REMOVAL OF PART CONCERNED**

- Remove the bolts (2).
- Gently lift the lock to extract the retaining hook (3).
- Remove the « exterior handle module - lock » assembly from the door box section.
- Disconnect the connectors (depending on equipment level).
- Unclip the exterior handle lock module cable.

**REFITTING**

**I - REFITTING OPERATION FOR PART CONCERNED**

- Clip the lock cable to the exterior handle module.
- Fit the « exterior handle module - lock » assembly into the door box section.
- Position the lock on the door box section retaining hook (4).
- Connect the connectors (depending on equipment level).
1. Torque tighten the lock bolts (8 Nm) (\[5\])
2. Clip the module on the door panel.
3. Fit the dummy lock.
4. Torque tighten the dummy lock locking bolt (2 Nm).
5. Fit the access blanking cover to the locking bolt of the dummy lock.
6. Rivet the exterior handle module (rivet part no. 7703072051).
8. Carry out a function test.
9. Close the access flap (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
10. Refit the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
SIDE OPENING ELEMENT MECHANISMS
Rear side door manual window winder mechanism: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION
a. Remove the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

b. Open the flap (1) to gain access to the window lift mechanism as indicated by the marking on the sealing film.

c. Lower the sliding window to allow access to the window clip.

d. Remove the window clip.

e. Secure the window in the raised position using masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED
a. Make cuts in the seal to access the window winder mechanism bolts (2).

b. Remove the bolts (2) and (3).

c. Remove the window lift mechanism.

REFITTING

I - OPERATION FOR REMOVAL OF PART CONCERNED
a. Refit the window lift mechanism in the door box section.

b. Position the sliding window.

c. Refit the sliding window clip.

Tightening torques:

- window winder mechanism bolts: 6.5 Nm

111945

112886
SIDE OPENING ELEMENT MECHANISMS

Rear side door manual window winder mechanism: Removal - Refitting

- Torque tighten the window winder mechanism bolts (6.5 Nm) following the tightening order: bolt 4, bolt 5 and bolts 6.
- Carry out a function test.

II - FINAL OPERATION.
- Close the access flap and the cuts in the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
- Refit the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

Note: When refitting the window lift mechanism, follow the tightening order. The tightening order ensures the correct alignment of the window lift mechanism and that the window is correctly positioned with the clip.
SIDE OPENING ELEMENT MECHANISMS

Rear side door electric window mechanism: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

a. Open the access flap (1) of the window winder mechanism following the marking on the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

a. Lower the window to allow access to the window mounting clip.

a. Unfasten the clip.

a. Secure the window in the raised position using masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Make cuts in the sealing film to access the window winder mechanism mounting bolts (2).

a. Remove the bolts (2) and (3).

a. Disconnect the window winder mechanism supply connector.

a. Remove the window lift mechanism.

REFITTING

I - OPERATION FOR REMOVAL OF PART CONCERNED

a. Fit the window winder mechanism in the door box section.

a. Connect the window winder mechanism supply connector.

a. Reposition the door window.

Tightening torques

m window winder mechanism mounting bolts

6.5 Nm
SIDE OPENING ELEMENT MECHANISMS

Rear side door electric window mechanism: Removal - Refitting

B85 or K85

- Torque tighten the window winder mechanism mounting bolts (6.5 Nm) following the tightening order: bolt (4), bolt (5), and bolt (6).
- Carry out a function test.

II - FINAL OPERATION

- Close the access flap and the cuts in the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
- Refit the door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

Note:
When refitting the window winder mechanism, tighten the bolts in the order shown. The tightening order ensures the correct alignment of the window lift mechanism and that the window is correctly positioned with the clip.
NON-SIDE OPENING ELEMENT MECHANISMS
Bonnet release control: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

- Remove:
  - the wheel arch liners (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41)
  - the front bumper (see Exterior protection, Front bumper: Removal - Refitting, page 55A-1)
  - the bonnet catch (see Non-side opening element mechanisms, Bonnet lock: Removal - Refitting, page 52A-5)
  - the battery (see Battery: Removal - Refitting (MR 392, 80A, Battery)).

- Unclip the power supply fuse support plate at (1).
- Pull out the fuse board support (2).
- Unclip the thermal protection shield at (3).
- Keep the fuse board support held away (4).
- Remove the heat protection shield (5) and (6).
- Remove the air filter box (see Air filter unit: Removal - Refitting) (MR 392, 12A, Fuel mixture).

Tightening torques
- Rear mounting bolts of the battery mounting: 21 Nm
- Front mounting bolt of the battery mounting: 8 Nm
NON-SIDE OPENING ELEMENT MECHANISMS
Bonnet release control: Removal - Refitting

a Remove the bolts (7).

a Unclip the various wiring harnesses.

a Remove the battery support.

a Remove nuts (8).

a Remove the fuel injection computer without disconnecting it.

a Remove the injection computer support (three nuts).

a Remove the nut (9).

a Remove the wiring harness support (10).

a Unclip the expansion bottle (11).

a Position the expansion bottle so that it does not hamper removal of the bonnet release cable.

a Remove the front door sill lining (see Front door sill lining: Removal - Refitting) (MR 393, 71A, Body internal trim).
NON-SIDE OPENING ELEMENT MECHANISMS
Bonnet release control: Removal - Refitting

II - OPERATION FOR REMOVAL OF PART CONCERNED

a
- Remove the bolt (12).
- Unclip the bonnet release control.
- Note the route of the bonnet release cable.
- Remove the bulkhead cable routing blanking piece.
- Remove the bonnet release cable.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

Refit:
- the bonnet release cable,
- the cable routing blanking piece,
- the bonnet release control,
- the bolt (13).

II - FINAL OPERATION

Refit:
- the front door sill lining (see Front door sill lining: Removal - Refitting (MR 393, 71A, Body internal trim)),
- the expansion bottle.
Refit:
- the wiring harness guide (14),
- the nut (15).

Refit:
- the fuel injection computer support (three nuts),
- the computer,
- the nuts (16).

Refit:
- the battery mounting,
- the various cable harnesses,
- the rear mounting bolts of the battery mounting (21 Nm), (17),
- the front mounting bolt of the battery mounting (8 Nm), (18),
- the air filter box (see Air filter unit: Removal - Refitting (MR 392, 12A, Fuel mixture)),
- the heat shield,
- the power supply fuse board support.

Refit:
- the battery (see Battery: Removal - Refitting (MR 392, 80A, Battery)),
- the bonnet catch (see 52A, Non-side opening element mechanisms, Bonnet lock: Removal - Refitting, page 52A-5),
- the front bumper (see 55A, Exterior protection, Front bumper: Removal - Refitting, page 55A-1),
REMOVAL
I - REMOVAL PREPARATION OPERATION
a Remove the front bumper (see 55A, Exterior protection, Front bumper: Removal - Refitting, page 55A-1).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Remove the bonnet catch bolts (1).
   a Remove the clip (2) using offset adjusting pliers.
   a Unclip the sheath stop from the bonnet opening cable.

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED
a Clip on:
   - the clip (2),
   - the bonnet opening cable.
   a Pretighten the bonnet catch bolts.
   a Adjust the flush fittings and shut lines on the bonnet.
   a Tighten to torque the bonnet catch bolts (21 Nm).

II - FINAL OPERATION
NON-SIDE OPENING ELEMENT MECHANISMS
Tailgate lock: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a) Unlock the tailgate lock by pushing lug (1) with a screwdriver.

II - OPERATION FOR REMOVAL OF PART CONCERNED
a) Remove the tailgate trim (see Tailgate trim: Removal - Refitting) (73A, Non-side opening elements trim).

a) Remove the tailgate lock bolts (2).

a) Partially remove the tailgate lock by pressing on the pre-retaining clip (3).

a) Disconnect the tailgate lock connector.

a) Remove the tailgate lock.

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED
a) Connect the tailgate lock connector.

a) Position the tailgate lock using the pre-retaining clip.

a) Torque tighten the tailgate lock bolts (8 N.m).

II - FINAL OPERATION
a) Carry out a function test.

a) Refit the tailgate trim (see Tailgate trim: Removal - Refitting) (73A, Non-side opening elements trim).

Tightening torques

| Tailgate lock bolts | 8 N.m |

Note:
If there is an electrical fault it is possible to open the tailgate manually.
Carry out this operation from inside the vehicle.
NON-SIDE OPENING ELEMENT MECHANISMS
Tailgate strut: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a
II - OPERATION FOR REMOVAL OF PART CONCERNED
a

Extract the clips (1)
Remove the struts whilst holding the tailgate.

REFITTING
I - REFITTING PREPARATION OPERATION
a
II - REFITTING OPERATION FOR PART CONCERNED
a

Offer up and clip in the struts.

WARNING
Note the direction in which the tailgate struts are fitted before removal.
TAILGATE OPENING SWITCH REMOVAL - REFITTING

I - REMOVAL PREPARATION OPERATION

a. Remove the tailgate trim (see Tailgate trim: Removal - Refitting) (MR 393, 73A, Non-side opening element trim).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Access the control via the tailgate interior.

  a. Squeeze the clips (1).
  a. Take control vectors.
  a. Disconnect the connector.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Connect the connector.

a. Clip on the tailgate opening control.

II - FINAL OPERATION

a. Refit the tailgate trim (see Tailgate trim: Removal - Refitting) (MR 393, 73A, Non-side opening element trim).
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof opening control: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED

a. Unclip the roof opening control using a flat-blade screwdriver (1).
a. Disconnect the connectors.

REFITTING
OPERATION FOR PART CONCERNED

a. Connect the connectors.
a. Clip the sunroof opening control.

112572
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof operating mechanisms: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbag and pretensioner)).

a Remove the sunroof's mobile panel (see 52A, Non-side opening element mechanisms, Sunroof mobile panel: Removal - Refitting, page 52A-13).

a Disconnect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

a Remove the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim).

a Disconnect the supply connector (1) from the sunroof motor.

a Unclip the wiring harness from the clips.

a Protect the vehicle interior.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Protect the sunroof frame using masking tape.

a Cut the cement bead located on the cross member using a cutting wire with two handles (this operation requires two people).

Equipment required

Diagnostic tool

IMPORTANT

To avoid any risk of triggering when working on or near a pyrotechnic component (airbags or pretensioners), lock the airbag computer using the diagnostic tool.

When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel lights up continuously (ignition on).

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
1. Begin cutting the cement bead from the rear side of the vehicle.

2. Cut the cement bead at the rear of the vehicle up to the level of the aerial mounting.

3. Repeat this operation on the other side before continuing to cut the cement bead.

4. When cutting the cement bead, make sure that the wire passes between the panel and the positioning shims on the edge of the sunroof operating mechanism.

5. When reaching the cross member, pass the wire between the cross member and the sunroof operating mechanism.
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof operating mechanism: Removal - Refitting

PANORAMIC SUNROOF

Remove the sunroof operating mechanism using the specific tools:
- Support: PARV 202
- Set of arch supports: APARV 200 ESP.

REFITTING

I - REFITTING PREPARATIONS OPERATION

For preparation and bonding (see Technical Note 560A, General procedure for bonding windows and sunroof).

II - REFITTING OPERATION FOR PART CONCERNED

Position:
- the two centring guides on the sunroof operating mechanism,
- the positioning shims on the sunroof operating mechanism.

Bond the sunroof operating mechanism using the special tools.
Connect the sunroof motor supply connector.
Equal out the clearances and shut lines.
Check that the sunroof operating mechanism positioning shims make contact with the roof.
Remove the two indexing guides 30 minutes after bonding the sunroof operating mechanism.

III - FINAL OPERATION

Refit:
- the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim),
- the sunroof's mobile panel (see 52A, Non-side opening element mechanisms, Sunroof mobile panel: Removal - Refitting, page 52A-13).
Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).
Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).
Initialise the sunroof motor (see Electric sunroof: Initialisation) (MR 394, 87D, Electric windows - Sunroof).

WARNING
When fitting the sunroof, take care not to block the water drainage holes (6).
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof mobile panel: Removal - Refitting

PANORAMIC SUNROOF

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Open the moving panel.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove the rear bolts (1) from the mobile panel.

Remove:
- the mobile panel front bolts (2),
- the mobile panel (this operation requires two people).

REFITTING

I - REFITTING PREPARATION OPERATION

a. Tightening torques

<table>
<thead>
<tr>
<th>Mobile panel front bolts</th>
<th>Mobile panel rear bolts</th>

</thead>
<tbody>
<tr>
<td>5.6 N.m</td>
<td>5.6 N.m</td>
</tr>
</tbody>
</table>

Note:
When removing and refitting the mobile panel, apply some HIGH-RESISTANCE THREADLOCK (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products) to the bolts.
When replacing a mobile panel, replace the bolts with the bolts supplied with the mobile panel.
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof mobile panel: Removal - Refitting

PANORAMIC SUNROOF

1. Using a lint-free cloth soaked in heptane (see Vehicle: Parts and consumables for the repair) (04B, Consumables - Products), clean:
   - the upper guide runner (3).
   - the operating mechanism (4).

2. Wipe areas (3) and (4) with a clean, dry lint-free cloth.

3. Using a fine brush, lightly grease internal areas (3) and (4) only with opening element grease (see Vehicle: Parts and consumables for the repair) (04B, Consumables - Products).

II - REFITTING OPERATION FOR PART CONCERNED

1. Refit the mobile panel (this operation requires two people).

2. Tighten to torque:
   - the mobile panel front bolts (5.6 N.m),
   - the mobile panel rear bolts (5.6 N.m).

3. Initialise the sunroof motor (see Electric sunroof: Initialisation) (87D, Electric windows - Sunroof).
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof deflector: Removal - Refitting

REMOVAL
1. REMOVAL PREPARATION OPERATION
Open the sunroof mobile panel.

II - OPERATION FOR REMOVAL OF PART CONCERNED
a. Remove:
   - bolts (1) and (2) whilst maintaining the deflector at (3),
   - the sunroof deflector.

Tightening torques
m deflector rear bolts 3 Nm
m deflector front bolts 3 Nm
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof deflector: Removal - Refitting

1. REFITTING PREPARATIONS OPERATION
   a. Position the deflector return spring.
   b. Keep applying pressure to the deflector at (4).
   c. Torque tighten the deflector rear bolts (3 Nm), (5).
   d. Torque tighten the deflector front bolts (3 Nm), (6).
   e. Clean the areas (7) with a lint-free cloth soaked with heptane.
   f. Wipe the areas (7) with a clean dry, lint-free cloth.
   g. Lightly lubricate the internal areas (7) only, using a fine brush with grease for opening element mechanisms (part no.: 77 11 419 865).

Note:
When removing and refitting the sunroof deflector, apply some high resistance threadlock to the bolts.
When replacing the sunroof deflector, replace the bolts with those supplied with the mobile panel.
PANORAMIC SUNROOF

3 - FINAL OPERATION.

NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof sun visors: Removal - Refitting
PANORAMIC SUNROOF

I - REMOVAL PREPARATION OPERATION
a) Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbag and pretensioner)).

b) Disconnect the battery (see Battery: Removal - Replacing (MR 392, 80A, Battery)).

c) Remove the headlining (see Headlining: Removal - Refitting (MR 393, 71A, Body internal trim)).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a) Remove the sunroof screen from the runners with a rotating movement.

b) Remove:
- the bolts (1),
- the sunroof screen.

Equipment required
Diagnostic tool

Tightening torques
m

screen mounting bolts 25 Nm

IMPORTANT
Before working on or near a safety system component; make sure that the airbag computer is locked using the Diagnostic tool. When this function is activated, all the triggering lines are inhibited and the airbag warning light on the instrument panel is continuously lit (ignition on).

IMPORTANT
Handling the pyrotechnic systems (airbags or pretensioners) near to a heat source or flame is prohibited: there is a risk of triggering the airbags or pretensioners.

**Sunroof sun visors: Removal - Refitting**

**PANORAMIC SUNROOF**

**REFITTING**

**I - REFITTING OPERATION FOR PART CONCERNED**

1. Position the screen.
2. Torque tighten the screen mounting bolts (25 Nm). (2)
3. Refit the screen in the runners.

**II - FINAL OPERATION**

1. Refit the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim).
2. Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).
3. Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).
NON-SIDE OPENING ELEMENT MECHANISMS
Sunroof water drain pipe: Removal - Refitting

52A

REMOVAL

I - REMOVAL PREPARATION OPERATION

a Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbag and pretensioners)).

a Disconnect the battery (see Battery: Removal - Refitting (MR 392, 80A, Battery)).

a Remove the headlining (see Headlining: Removal - Refitting (MR 393, 71A, Body internal trim)).

1 - Special features for preparing to remove the front drain pipes

a Remove:

- the centre console (see 57A, Interior equipment, Centre console: Removal - Refitting, page 57A-14),
- the dashboard (see 57A, Interior equipment, Dashboard: Removal - Refitting, page 57A-1),

2 - Special features for preparing to remove the rear drain pipes

a Remove:

- the rear end panel trim (see Rear end panel lining: Removal - Refitting) (MR 393, 71A, Body internal trim),
- the rear wheel arch trim (see Rear wheel arch trim: Removal - Refitting) (MR 393, 71A, Body internal trim),
- the rear wheel arch liner (see 55A, Exterior protection, Rear wheel arch liner: Removal - Refitting, page 55A-43).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Retrieve the anti-return valve.

a Remove the water drain pipe from inside the vehicle.

Equipment required:
Diagnostic tool

IMPORTANT
Before working on or near a safety system component; make sure that the airbag computer is locked using the Diagnostic tool. When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel is continuously lit (with the ignition on).

IMPORTANT
Handling the pyrotechnic systems (airbags or pretensioners) near to a heat source or flame is prohibited: there is a risk of triggering the airbags or pretensioners.
REFITTING
I - REFITTING OPERATION FOR PART CONCERNED

a
- Turn:
  - the drain pipe correctly in position.
  - the anti-return valve on the drain pipe.

II - FINAL OPERATION.

1 - Special features of the final operation for the rear drain pipes
a
- Refit:
  - the rear wheel arch liner (see Exterior protection, Rear wheel arch liner: Removal - Refitting, page 55A-43),
  - the rear wheel arch trim (see Rear wheel arch trim: Removal - Refitting) (MR 393, 71A, Body internal trim).

a
- Refit the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim).

a
- Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

a
- Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).

2 - Special features for the final operation on the front drain pipes
a
- Refit:
  - the front wheel arch liners (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41),
  - the dashboard (see Interior equipment, Dashboard: Removal - Refitting, page 57A-1),
  - the centre console (see Interior equipment, Centre console: Removal - Refitting, page 57A-14).

a
- Refit the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim).

a
- Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

a
- Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).
**Windscreen: Removal - Refitting**

**REMOVAL**

I - REMOVAL PREPARATION OPERATION

- Remove:
  - the scuttle panel grille (see 56A, Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1),
  - the windscreen trims (see 54A, Windows, Windscreen trim: Removal - Refitting, page 54A-3),
  - the interior rear-view mirror (see 57A, Interior equipment, Interior rear-view mirror: Removal - Refitting, page 57A-21),
  - the A-pillar trims (see Windscreen pillar trim: Removal - Refitting) (MR 393, 71A, Body internal trim).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove the windscreen upper seal (1).
- Protect the windscreen surround using masking tape.
- Position the dashboard protector (Car. 1764).
- Cut the cement bead.

**REFITTING**

I - REFITTING PREPARATION OPERATION

- Position the retaining shims and stops.
- Position the upper seal on the windscreen.
- For preparation and bonding (see Technical Note 560A, General procedure for bonding windows and sunroof).

II - REFITTING OPERATION FOR PART CONCERNED

- Bond the windscreen.
- This operation requires two people.
- Special tooling required: Car. 1764 Instrument panel protector.

**WARNING**

- Leave the rain sensor in place on the old windscreen during the replacement operation.
- When cutting the cement bead, take care not to cut the wiring harness.
- Use high modulus adhesive when bonding the windscreen.
Windscreen: Removal - Refitting

- « windscreen - roof panel »,
- « windscreen - windscreen aperture pillar ».

**III - FINAL OPERATION**

a Replace the adhesive base of the rain and light sensor (see Rain and light sensor: Removal - Refitting) (MR 392, 85A, Wiping - Washing).

b Refit:
- the interior rear-view mirror (see Interior equipment, Interior rear-view mirror: Removal - Refitting, page 57A-21),
- the A-pillar trims (see Windscreen pillar trim: Removal - Refitting) (MR 393, 71A, Body internal trim),
- the windscreen trims (see Windows, Windscreen trim: Removal - Refitting, page 54A-3),
- the scuttle panel grille (see Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1).
Windscreen trim: Removal - Refitting

I - REMOVAL PREPARATION OPERATION

a. Remove the scuttle panel grille (see 56A, Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Carefully unclip the windscreen trim.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Check the condition of the fixing clips and replace them if necessary.

a. Align the pin (2) on the indent (3) to position the trim piece.

a. Unclip the windscreen trim piece.

a. Refit the clips (1).

II - FINAL OPERATION.

a. Refit the scuttle panel grille (see 56A, Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1).
REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove:
   - the door trim (see Front side door trim: Removal - Refitting) (MR 393,72A, Side opening element trim),
   - the interior weatherstrip.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Open the window lift mechanism access according to the marking on the sealing film.

a. Lower the window in order to access the clips (1) on the sliding window.

a. Remove the clips from the sliding window (1).

a. Remove the front side sliding door window.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Refit:
   - the sliding window,
   - the sliding window clips.

a. Carry out a function test.

Note: If the window is broken, replace the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
Front side door sliding window: Removal - Refitting

II - FINAL OPERATION.

a Close the access flaps or replace (if the window is broken) the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

a Refit:
- the interior weatherstrip,
- the door trim (see Front side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
REMOVAL

I - REMOVAL PREPARATION OPERATION

a) Remove the rear door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

b) Open the access flap at the window lift mechanism according to the marking on the sealing film.

c) Lower the window to access the sliding window clip (1).

d) Remove the interior weatherstrip.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a) Remove the sliding window clip (1).

b) Fit the window at the bottom of the door box section.

Note:
If the window is broken, replace the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).
Rear side door sliding window: Removal - Refitting

**B85 or K85**

1. **A3**
   - Remove the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting) (MR 393, 66A, Window sealing).

2. **A2**
   - Remove the rear side door's sliding window.

**REFITTING**

1. **I - REFITTING OPERATION FOR PART CONCERNED**
   - Fit:
     - the rear side door's sliding window at the bottom of the door box section,
     - the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting) (MR 393, 66A, Window sealing), take care not to damage the outer weatherstrip,
     - the sliding window on the window winder mechanism,
     - the sliding window clip.

2. **II - FINAL OPERATION**
   - Carry out a function test.
   - Close the access flaps or replace (if the window is broken) the sealing film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Door sealing).

3. **III - REFITTING OPERATION FOR PART CONCERNED**
   - Fit:
     - the interior weatherstrip,
     - the rear door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
REMOVAL
I - REMOVAL PREPARATION OPERATION
a Remove:
- the rear wing panel trim (see Rear panel lining: Removal - Refitting) (71A, Body internal trim),
- the rear roof drip moulding trim (see Side roof rail rear trim: Removal - Refitting) (71A, Body internal trim),
- the upper trim of the C-pillar (see C-pillar upper trim: Removal - Refitting) (71A, Body internal trim).

a Remove:
- the rear inner sill upper trim (see Rear inner sill upper trim: Removal - Refitting) (71A, Body internal trim),
- the rear parcel shelf side trim (see Rear parcel shelf side trim: Removal - Refitting) (71A, Body internal trim).

a Remove the rear quarter panel trim (see Quarter panel trim: Removal - Refitting) (71A, Body internal trim).

II - OPERATION FOR REMOVAL OF PART CONCERNED
Rear quarter panel window: Removal - Refitting

C85 or K85 or S85

Protect the edges of the quarter panel window using masking tape.

Cut the cement bead (see Technical Note 560A).

**REFITTING**

**I - REFITTING PREPARATION OPERATION**
- Replace the seal (1) if necessary (if fitted to the vehicle).
- Always replace the stops.
- For preparation and bonding (see Technical Note 560A).

**II - OPERATION FOR REFITTING PART CONCERNED**
- Bond the rear quarter panel window.
- Equal out the clearances and shut lines.
- Remove the tabs from the stops when the adhesive has dried.

**III - FINAL OPERATION**
- Refit the rear quarter panel trim (see Quarter panel trim: Removal - Refitting) (71A, Body internal trim).
- Refit:
  - the upper trim of the C-pillar (see C-pillar upper trim: Removal - Refitting) (71A, Body internal trim).
  - the rear roof drip moulding trim (see Side roof rail rear trim: Removal - Refitting) (71A, Body internal trim).
Rear quarter panel window: Removal - Refitting C85 or K85

- the rear wing panel trim (see Rear panel lining: Removal - Refitting)

- the rear parcel shelf side trim (see Rear parcel shelf side trim: Removal - Refitting)

- the rear inner sill upper trim (see Rear inner sill upper trim: Removal - Refitting)
REMOVAL

I - REMOVAL PREPARATION OPERATION

- Remove rear door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim),
- Remove the sliding window from the rear side door. (see Windows, Rear side door sliding window: Removal - Refitting, page 54A-6).
- Remove the rivets (1) using a 5 mm diameter drill bit.
- Retrieve any rivets that may have fallen into the door box section.
- Remove the fixed upright channel (2).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Unclip the clips (4) using a scratch awl or a small flat-blade screwdriver.

Note: In the case of right-hand drive vehicles, unclip the fixed window clip underneath the seal at (3).
Rear side door fixed window: Removal - Refitting

- Remove the exterior weatherstrip - rear side door fixed window assembly.
- Release the fixed window from the frame seal.

REFITTING

- Refit:
  - the fixed window in the frame seal,
  - the exterior weatherstrip - rear side door fixed window assembly.

FINAL OPERATION

- Fit:
  - the fixed upright channel,
  - the rivets.
- Clip the exterior weatherstrip on to the door.
- Refit the sliding window in the rear side door (see Windows, Rear side door sliding window: Removal - Refitting, page 54A-6).
- Refit the rear side door trim (see Rear side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
REMOVAL

I - REMOVAL PREPARATION OPERATION

- Remove:
  - the tailgate trim (see Tailgate trim: Removal - Refitting (73A, Non-side opening elements trim)),
  - the rear screen wiper arm (see Rear screen wiper arm: Removal - Refitting (85A, Washing - Wiping)),
  - the rear screen wiper motor (see Rear screen wiper motor: Removal - Refitting (85A, Washing - Wiping)).
- Disconnect the de-icing connectors.
- Remove the high level brake light (see 3rd brake light: Removal - Refitting (81A, Rear lighting)).
- Remove the tailgate spoiler (see 56A, Exterior equipment, Tailgate spoiler: Removal - Refitting, page 56A-3).
- Remove the side seals (1).
Rear screen: Removal - Refitting

- Protect the edges of the rear screen using masking tape.
- Cut the cement bead (see Technical Note 560A).

REFITTING

I - REFITTING PREPARATION OPERATION
- Replace the rear screen adjuster shim (50,04,12,03).
- Refit the rear screen wiper motor (see Rear screen wiper motor: Removal - Refitting (85A, Wiping - Washing)).
- For preparation and bonding (see Technical Note 560A).

II - REFITTING OPERATION FOR PART CONCERNED
- Bond the rear screen (this operation requires two people).
- Equal out the clearances and shut lines.
- Remove the tabs from the stops once the adhesive has dried.

III - FINAL OPERATION
- Refit the side seals (1).
- Refit the tailgate spoiler (see 56A, Exterior equipment, Tailgate spoiler: Removal - Refitting, page 56A-3).
- Refit the high level brake light (see 3rd brake light: Removal - Refitting) (81A, Rear lighting).
- Connect the de-icing connectors.
- Refit the rear screen wiper arm (see Rear screen wiper arm: Removal - Refitting) (85A, Wiping - Washing).
- Carry out a function test.
- Refit the tailgate trim (see Tailgate trim: Removal - Refitting) (73A, Non-side opening elements trim).
Sunroof side trim: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Protect the edges of the trim with masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. 1 - Removing the side trim from the sunroof (OE component)
   b. Remove the sunroof's mobile panel (see 52A, Non-side opening element mechanisms, Sunroof mobile panel: Removal - Refitting, page 52A-13).
   c. Cut the cement bead using a flat chisel (1) slid between the sunroof operating mechanism and the trim.

a. 2 - Removing the side trim from the sunroof (replacement component)
   b. Cut the cement bead using a cutting wire with two handles.

REFITTING

I - REFITTING PREPARATION OPERATION

II - REFITTING OPERATION FOR PART CONCERNED

a. Bond the trim.
   b. Respect the clearances and shut lines.

III - FINAL OPERATION

final operation in refitting the sunroof side trim (OE component)

a. Refit the mobile panel to the sunroof (see 52A, Non-side opening element mechanisms, Sunroof mobile panel: Removal - Refitting, page 52A-13).
   b. Initialise the sunroof motor (see MR 394 Fault finding, 87D, Electric window - sunroof, Electric sunroof: Initialisation).

Note:
Fixed side trims may be removed in one of two ways, depending on the bonding method used (OE trim or replacement trim).
To know which method to use, perform a test, using the OE trim removal method, if cutting is too difficult, use the replacement trim removal method.

WARNING
It is essential to use « high Modulus » adhesive for bonding the sunroof's side trim.
REMOVAL

I - REMOVAL PREPARATION OPERATION

- Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbag and pretensioners)).
- Disconnect the battery (see Battery: Removal - Refitting (MR 392, 80A, Battery)).
- Remove the headlining (see Headlining: Removal - Refitting (MR 393, 71A, Body internal trim)).
- Protect:
  - the sunroof's fixed window surround and the rear section of the roof using masking tape,
  - the inside of the vehicle.

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Begin cutting the cement bead.
- This operation requires two people.
- Remove the fixed window from the sunroof.

REFITTING

I - REFITTING PREPARATION OPERATION

- For preparation and bonding (see Technical Note 560A, General procedure for bonding windows and sunroof).
- Position the new positioning shims on the sunroof operating mechanism.

II - REFITTING OPERATION FOR PART CONCERNED

- Bond the sunroof's fixed window using special tools:
  - Support: PARV 202
  - Set of arch supports: APARV ESP.
- This operation requires two people.

IMPORTANT

Before carrying out any work on or near a safety system component, lock the airbag computer using the Diagnostic tool. When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel is continuously lit (with the ignition on).

It is forbidden to work on pyrotechnic systems (pretensioner or airbag) near a source of heat or a naked flame: there is a risk of the airbags or pretensioners being triggered.

WARNING

It is essential to use high modulus adhesive for bonding the sunroof's fixed window.
Sunroof fixed window: Removal - Refitting

Respect the clearances and shut lines

Observe the clearance between the sunroof's fixed window (1) and mobile panel (2), (8 mm).

The sunroof's fixed window (1) should be slightly lower than its mobile panel (2).

Arrange the lateral clearances so that they are equal.

III - FINAL OPERATION.

Refit the headlining (see Headlining: Removal - Refitting) (MR 393, 71A, Body internal trim).

Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).

113525
EXTERIOR PROTECTION
Front bumper: Removal - Refitting

I - REMOVAL PREPARATION OPERATION
a. Position the vehicle on a two-post lift (see Vehicle: Towing and lifting) (MR392, 02, Lifting equipment).

a. Remove:
   - the lower bolts (1).
   - the front parts of the front wheel arch liners (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41).

a. Disconnect the connector (2) (depending on equipment level).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a. Remove the bolts (3).

a. Remove the bolts and clips (4).
EXTERIOR PROTECTION
Front bumper: Removal - Refitting

- Unclip the side sections of the front bumper.
- Remove the front bumper unit (this operation requires two people).
- Disconnect the headlight washer jet supply (depending on equipment level).

REFITTING

I - REFITTING PREPARATION OPERATION
- Unclip the trim.
- Check the tyre size.

II - REFITTING OPERATION FOR PART CONCERNED
- Reconnect the headlight washer jet supply (depending on equipment level).
- Refit the front bumper unit (this operation requires two people).

Note:
During a replacement operation, order the front bumper according to the mark (6) on the front wing of the vehicle:
- Tyre size smaller than or equal to 185 = mark on front wing (6) which reads 185.
- Tyre size 195 = mark on front wing (6) which reads 195.
EXTERIOR PROTECTION

Front bumper: Removal - Refitting

a Refit the bolts (7).

a Refit the bolts and clips (8).

a Refit the bolts (9).

III - FINAL OPERATION.

a Reconnect the connector (10) (depending on equipment level).

a Test all of the functions with a function test (depending on equipment level).

a Refit the front parts of the front wheel arch liners (see 55A, Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41).
EXTERIOR PROTECTION

Front bumper: Conversion

HEADLIGHT WASHERS WITH BLADE

ADAPTATION

Make the conversion using the special tool (part no: 77 11 419 232).

Note:
When a front bumper is replaced, the replacement part needs to be modified before it is painted so that the headlight washer jets can be fitted.

   - the clips (7),
   - the fog light supports.
a. Unclip the clips.
a. Remove the lower grille (8).
EXTERIOR PROTECTION
Front bumper: Stripping - Rebuilding

I - REBUILDING OPERATION FOR PART CONCERNED
a Refit and rivet the lower cover.

II - FINAL OPERATION
a Refit the front bumper (see Exterior protection, Front bumper: Removal - Refitting, page 55A-1).

REBUILDING
1. Refit the lower lower and the lower grille.
2. Refit the absorber.
3. Refit the headlight washer jets.
4. Refit the front bumper.
5. Refit the bolts (1).
6. Connect the connectors.
7. Refit the front badge.
8. Refit the radiator half-grilles, the stiffener, the absorber.
9. Refit the fog light wiring harness, the fog lights, the bolts (4).
10. Refit the clips (3), (7), (10).
11. Clip: the lower trim strip starting with the centre of the part (10), the lower grille.

a Unclip the lower trim piece.

a Drill out the rivets (9).
EXTERIOR PROTECTION
Front bumper: Stripping - Rebuilding

I - STRIPPING PREPARATION OPERATION

a. Position the vehicle on a two-post lift (see Vehicle: Towing and lifting (02A, Lifting equipment)).

a. Remove:
   - the front wheels (see Wheel: Removal - Refitting (35A, Wheels and tyres)),
   - the front wheel arch liners (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41),
   - the front bumper (see Exterior protection, Front bumper: Removal - Refitting, page 55A-1).

II - STRIPPING OPERATION FOR PART CONCERNED

a. Remove:
   - the front bumper wiring (see Front bumper wiring: Removal - Refitting) (88A, Wiring),
   - the front fog lights (see Exterior protection, Front fog light: Removal - Refitting) (80B, Headlights).

a. Remove the headlight washer jets (see Headlight washer jet: Removal - Refitting) (85A, Wiping - Washing).

a. Mark the position of the headlight washer jet pipe on the front bumper.

a. Remove the headlight washer jet pipe from the front bumper.

a. Unclip the absorber at (1) by pressing the clips (2).

a. Remove the absorber.

a. Remove the front badge bolts (3).

a. Cut the front bumper clips (4).

a. Unclip:
   - the front badge,
   - the stiffener by pressing the clips (5).

EXTERIOR PROTECTION
Front bumper: Stripping - Rebuilding

- Unclip the blanking covers by pressing the clips (6).
- Remove the blanking covers at (7).
- Unclip the impact strips by pressing the clips.
- Remove the impact strips from the front of the front bumper, starting with the side impact strips.
- Drill the rivets out.
- Remove the diffuser (8).
- Remove:
  - the front fog light mounting clips (9),
  - the front fog light mountings at (10).
EXTERIOR PROTECTION

Front bumper: Stripping - Rebuilding

- Unclip the upper radiator grille by pressing the clips.
- Remove the upper radiator grille at (11).
- Unclip the lower radiator grille by pressing the clips.
- Remove the lower radiator grille at (12).
- Remove the bolts (13) from the side spoilers.
- Drill out the rivets (14).
- Remove the centre spoiler (15).
EXTERIOR PROTECTION

Front bumper: Stripping - Rebuilding

EQUIPMENT LEVEL EAG

Drill out the rivets of the side spoilers (16).

Remove:
- the side spoilers (17),
- the side spoiler mountings.

Drill out the rivets (18).

Remove the Centre spoiler mounting at (19).

REBUILDING

I - REBUILDING PREPARATION OPERATION

- parts always to be replaced: front bumper rivet (50,05,02,18).
- parts always to be replaced: Front bumper clip (50,05,02,17).

Check the clips of the front fog light mountings, and replace them if necessary.

II - REBUILDING OPERATION FOR PART CONCERNED

Refit and rivet the Centre spoiler mounting using the rivet gun.

Refit the side spoiler mountings.

Refit and rivet using the rivet gun:
- the side spoilers,
- the centre spoiler.

Clip:
- the lower radiator grille,
- the upper radiator grille.

Refit the front fog light mountings.

Refit and rivet the diffuser using the rivet gun.

Clip:
- the impact strips on the front bumper,
- the blanking covers,
- the stiffener,
- the front badge.

Attach the stiffener using new front bumper clips.

Refit the front badge bolts.

Clip the absorber into place.

Refit:
- the headlight washer jet pipe on the bumper as marked before removal,
- the headlight washer jets (see Headlight washer jet: Removal - Refitting (85A, Wiping - Washing).

Refit:
- the front fog lights (see Front fog light: Removal - Refitting (80B, Headlights),
- the front bumper wiring (see Front bumper wiring: Removal - Refitting (88A, Wiring).
Refit:
- the front bumper (see Exterior protection, Front bumper: Removal - Refitting, page 55A-1),
- the front wheel arch liners (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41),
- the front wheels (see Wheel: Removal - Refitting).

REBUILDING

I - REBUILDING PREPARATION OPERATION

- Parts always to be replaced: front bumper rivet (50,05,02,18).
- Parts always to be replaced: front bumper clip (50,05,02,17).
- Parts always to be replaced: front bumper trim (50,05,02,08).

- Use a LINT-FREE CLOTH with HEPTANE (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products)) to clean the part of the front bumper in contact with the lower centre trim piece.
- Use a clean and dry LINT-FREE CLOTH (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products)) to wipe the part of the front bumper in contact with the lower centre trim piece.
- Check the clips of the front fog light trims, and replace them if necessary.
- Check the clips of the front fog light mountings, and replace them if necessary.

II - REBUILDING THE PART CONCERNED

- Position the spoiler.
- Drill a hole at the position of each clip using a 4.5 mm drill bit.
- Rivet the spoiler.
- Clip:
  - the lower radiator grille,
  - the upper radiator grille.
- Refit the front fog light mountings.
- Refit the front fog light trims.
- Refit and rivet the diffuser.
- Clip:
  - the impact strips,
  - the blanking covers,
  - the stiffener,
  - the front badge.
- Attach the stiffener using new front bumper clips.
- Refit the front badge bolts.
- Clip the absorber into place.
- Bond a new lower centre trim piece on the front bumper.

II - REBUILDING OPERATION FOR PART CONCERNED

- Refit and rivet the upper trim of the front bumper using a rivet gun.
- Refit the front bumper centre trim.
- Clip on the centre grille.
- Refit and rivet using a rivet gun:
  - the aerodynamic fins,
  - the diffuser.
- Clip on the stiffener.
- Refit:
  - the front badge,
  - the tow eye flap.
- Refit the fog light trims (4).
- Refit the absorber (1).
- Refit:
  - the headlight washer jet pipe on the front bumper,
  - the headlight washer jets (see Headlight washer jet: Removal - Refitting (85A, Wiping - Washing).
- Refit:
  - the front fog lights (see Front fog light: Removal - Refitting (80B, Headlights),
  - the front bumper wiring (see Front bumper wiring: Removal - Refitting (88A, Wiring).

III - FINAL OPERATION

- Refit:
  - the front bumper (see 55A, Exterior protection, Front bumper: Removal - Refitting, page 55A-1),
  - the front wheel arch liners (see 55A, Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41),
  - the front wheels (see Wheel: Removal - Refitting (35A, Wheels and tyres).

WITHOUT ADDITIONAL HEADLIGHTS

HEADLIGHT WASHERS WITH BLADE

FOG LIGHTS
REMOVAL

I - REMOVAL PREPARATION OPERATION

a

- Remove the rear wing lights (see Rear wing light: Removal – Refitting) (81A, Rear lighting).

b

- Disconnect the rear bumper wiring connector (1).

c

- Position the vehicle on a two-post lift (see Vehicle: Towing and lifting) (02A, Lifting equipment).

d

- Remove:

  - the rear wheels (see Wheel: Removal – Refitting) (35A, Wheels and tyres),
  - the rear wheel arch liners (see Exterior protection, Rear wheel arch liner: Removal – Refitting, page 55A-43).

II - OPERATION FOR REMOVAL OF PART CONCERNED

Tailgate strip: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a) Remove:
   - the tailgate trim (see Tailgate trim: Removal - Refitting) (73A, Non-side opening elements trim),
   - the tailgate opening switch (see 52A, Non-side opening element mechanisms, Tailgate opening switch: Removal - Refitting, page 52A-8) (87C, Opening element management).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a) Remove:
   - the nuts (1),
   - the tailgate strip.
a) Disconnect the license plate light connectors.

REFITTING
I - REFITTING PREPARATION OPERATION
a) Always replace the sealing foam.
a) Clean the adhesive surface of the sealing foam using a LINT-FREE CLOTH soaked in HEPTANE (see Vehicle: Parts and consumables for the repair) (04B, Consumables - Products).
a) Wipe the adhesive surface of the sealing foam with a clean, dry LINT-FREE CLOTH.
a) Check the cleanliness of the tailgate and the tailgate strip before refitting the tailgate strip.
a) Connect the number plate light connectors.

II - REFITTING OPERATION FOR PART CONCERNED
a) Refit:
   - the tailgate strip,
   - the nuts (1).

III - FINAL OPERATION.
a) Refit the tailgate opening switch (see 52A, Non-side opening element mechanisms, Tailgate opening switch: Removal - Refitting, page 52A-8) (87C, Opening element management).
a) Carry out a function test on all functions.
a) Refit the tailgate trim (see Tailgate trim: Removal - Refitting) (73A, Non-side opening elements trim).
EXTERIOR PROTECTION
Front side door protective strip: Removal - Refitting

I - REMOVAL PREPARATION OPERATION
a. Unclip the blanking cover (1).

a. Remove the bolt.

a. Remove the side mounted indicator (2) using a small flat screwdriver.

a. Disconnect the power supply connector.

II - REMOVAL OPERATION FOR PART CONCERNED
a. Slide the door rubbing strip towards the rear of the vehicle.

III - REFITTING OPERATION FOR PART CONCERNED
a. Slide the door moulding towards the front of the vehicle.

IV - FINAL OPERATION.

a. Refit:
   - the protective strip mounting bolt,
   - the blanking cover,
   - the mounted indicator.
EXTERIOR PROTECTION

B85 or C85 or S85, and EQUIPMENT LEVEL E3 LEISURE or EQUIPMENT LEVEL EA1 or EQUIPMENT LEVEL EA2 or EQUIPMENT LEVEL EA3 or EQUIPMENT LEVEL EA5 or EQUIPMENT LEVEL EAG, and
DOCUMENTATION PHASE 2
- the rear fog light (see Rear fog lights: Removal - Refitting (81A, Rear lighting),
- the rear bumper wiring (see Rear bumper wiring: Removal - Refitting (88A, Wiring).

II - FINAL OPERATION
a Refit:
- the rear bumper (see 55A, Exterior protection, Rear bumper: Removal - Refitting, page 55A-26),
- the rear wing lights (see Rear wing light: Removal - Refitting (81A, Rear lighting),
- the rear wheel arch liners (see 55A, Exterior protection, Rear wheel arch liner: Removal - Refitting, page 55A-43),
- the rear wheels (see Wheel: Removal - Refitting (35A, Wheels and tyres).
EXTERIOR EQUIPMENT
Scuttle panel grille: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a Remove the wiper arms (see Windscreen wiper arm: Removal - Refitting). (MR 392, Mechanical systems, 85A, Washing - Wiping).
a Remove the seal (1).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Remove clips (2).
a Remove the scuttle panel grille (3) and (4).

REFITTING
I - REFITTING PREPARATION OPERATION

II - REFITTING OPERATION FOR PART CONCERNED
Refit:
- the scuttle panel grille,
- the clips (5).

Note: Check that the windscreen and the scuttle panel grille are clean before refitting.
EXTERIOR EQUIPMENT
Scuttle panel grille: Removal - Refitting

III - FINAL OPERATION.

Refit:
- the seal (6),
- the wiper arms (see Windscreen wiper arm: Removal - Refitting) (MR 392, Mechanical systems, 85A, Washing - Wiping).
EXTERIOR EQUIPMENT
Tailgate spoiler: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED

a Remove:
- the blanking covers (1),
- the nuts (2).

a Unclip the tailgate spoiler at (3).

a Disconnect:
- the high level brake light connector,
- the rear screen washer jet pipe.

a Remove the tailgate spoiler.

REFITTING
I - REFITTING PREPARATION OPERATION

a Check:
- the clips and replace if necessary,
- the cleanliness of the tailgate spoiler and the tailgate before refitting the tailgate spoiler.

a Connect:
- the high level brake light connector,
- the rear screen washer jet pipe.

II - REFITTING OPERATION FOR PART CONCERNED

a Clip on the tailgate spoiler.

Page 3
EXTERIOR EQUIPMENT
Tailgate spoiler - Removal - Refitting

Refit:
- the nuts (2),
- the blanking covers (1).

III - FINAL OPERATION.
- Carry out a function test on all functions.
EXTERIOR EQUIPMENT
Tailgate spoiler: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED

1. Tailgate spoiler cover

- Remove the bolts (1).
- Detach the DOUBLE-SIDED ADHESIVE TAPE of the tailgate spoiler cover at (2) using the Car. 1363.
- Place a 2.5 mm offset wrench in the holes (3).
- Unclip the tailgate spoiler cover at (4).

Special tooling required
Car. 1363
Set of trim removal levers.

141621
141622
141623
EXTERIOR EQUIPMENT
Tailgate spoiler: Removal - Refitting

1. Disconnect the high-level brake light connector (5).
2. Remove the tailgate spoiler cover.
3. Partially remove the wiring of the high-level brake light connector (6).
4. Disconnect the rear screen washer jet pipe (7).
5. Partially remove the rear screen washer jet pipe (7).
6. Unclip the rear screen washer jet at (8).
7. Remove:
   - the bolts (9),
   - the tailgate spoiler mounting.
EXTERIOR EQUIPMENT
Tailgate spoiler: Removal - Refitting

I - REFITTING PREPARATION OPERATION

- Remove any adhesive residue on the tailgate using a LINT-FREE CLOTH soaked in HEPTANE (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products)).

- Wipe the upper section of the tailgate using a clean, dry LINT-FREE CLOTH (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products)).

- Replace the DOUBLE-SIDED ADHESIVE TAPE (see Vehicle: Parts and consumables for the repair (04B, Consumables - Products)) on the tailgate spoiler cover.

II - REFITTING OPERATION FOR PART CONCERNED

1 - Tailgate spoiler mounting

- Refit:
  - the tailgate spoiler mounting,
  - the bolts (9) in the order (10) then (11).

- Clip on the rear screen washer jet.

- Refit the rear screen washer jet pipe (7).

- Connect the rear screen washer jet pipe (7).

- Refit the wiring of the high-level brake light connector (6).

2 - Tailgate spoiler cover

- Connect the high-level brake light connector (5).

- Carry out a function test.

- Remove the protective backing from the DOUBLE-SIDED ADHESIVE TAPE.

- Refit the tailgate spoiler cover.

- Clip on the tailgate spoiler cover.

- Refit the bolts (1).

- Press the side sections to bond the tailgate spoiler cover.

Note: Clean the felt of the tailgate spoiler cover before refitting.
EXTERIOR EQUIPMENT
Scoop under the scuttle panel grille: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a Remove the scuttle panel grille (see Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1).
a Remove the trim under the scuttle panel grille (1).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Remove:
   - the bolts (2),
   - the blanking covers (3).
   Remove the bolts (4).
   Extract the scoop under the scuttle panel grille.

REFITTING
I - REFITTING PREPARATION OPERATION
a WARNING
   It is essential to replace the foam strips which seal the scoop under the scuttle panel grille. The foam strips are available from the Parts Department.
EXTERIOR EQUIPMENT
Scoop under the scuttle panel grille: Removal - Refitting

II - REFITTING OPERATION FOR PART CONCERNED

a Refit the bolts (5).
a Refit:
- the blanking covers (6),
- the bolts (7).

III - FINAL OPERATION

a Reclip the trim under the scuttle panel grille.
a Refit the scuttle panel grille (see Exterior equipment, Scuttle panel grille: Removal - Refitting, page 56A-1).
EXTERIOR EQUIPMENT
Door mirror Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION
a Unclip the trim (1).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Remove:
- the sealing foam (2),
- the bolts (3),
- the door mirror.
- Disconnect the supply connectors (depending on equipment level).

Unclip the casing (4).
EXTERIOR EQUIPMENT
Door mirror: Removal - Refitting

- Remove the bolts (5).

- Remove the door mirror.

REFITTING

- Connect the supply connector (depending on equipment level).

- Refit:
  - the door mirror,
  - the bolts (6),
  - the sealing foam.

- Position the door mirror.

- Refit the door mirror bolts.

- Clip the casing in place.
EXTERIOR EQUIPMENT
Door mirror: Removal - Refitting

1. Clip the trim piece in place (7).

111923
EXTERIOR EQUIPMENT
Door mirror casing: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove the door mirror glass (see 56A, Exterior equipment, Door mirror glass: Removal - Refitting, page 56A-16).

II - REMOVAL OPERATION FOR PART CONCERNED

a. Unclip the clips (1).

a. Fold in the door mirror.

a. Unclip the door mirror casing.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Reclip the door mirror casing in position.

II - FINAL OPERATION

a. Refit the door mirror glass (see 56A, Exterior equipment, Door mirror glass: Removal - Refitting, page 56A-16).
EXTERIOR EQUIPMENT
Door mirror casing: Removal - Refitting

SCHOOL VEHICLE

REMOVAL
I - REMOVAL PREPARATION OPERATION

a Remove the door mirror glass (see Exterior equipment, Door mirror glass: Removal - Refitting, page 56A-16).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Unclip the casing (1).

a Remove the bolts (2).

a Remove the door mirror.

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED

a Clip on the door mirror casing.

a Fold in the door mirror.

a Unclip the door mirror casing.
Offer up the door mirror.

Refit the bolts (4).

Clip on the casing.

Refit the door mirror glass (see 56A, Exterior equipment, Door mirror glass: Removal - Refitting, page 56A-16).
EXTERIOR EQUIPMENT
Door mirror glass: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED

- Unclip the door mirror glass using Car. 1363.
- Disconnect the supply connectors (depending on the equipment level).

REFITTING
PREPARATION OPERATION

- Connect the supply connectors (depending on the equipment level).
- Clip the door mirror glass in position.

Special tooling required
Car. 1363
Set of trim removal levers.
EXTERIOR EQUIPMENT
Side decorative strips: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION

1 - Front side door
a. Remove:
- the front side door trim (see Front side door trim: Removal - Refitting) (72A, Side opening element trim),
- the door mirror (see 56A, Exterior equipment, Door mirror: Removal - Refitting, page 56A-10),
- the front side door sliding window (see 54A, Windows, Front side door sliding window: Removal - Refitting, page 54A-4),
- the front side door glass run channel (see Front side door window run channel: Removal - Refitting) (66A, Window sealing),
- the front side door exterior weatherstrip (see Front side door exterior weatherstrip: Removal - Refitting) (66A, Window sealing).

2 - Rear side door
a. Remove:
- the rear side door trim (see Rear side door trim: Removal - Refitting) (72A, Side opening element trim),
- the rear side door sliding window, without removing it from the door box section (see 54A, Windows, Rear side door sliding window: Removal - Refitting, page 54A-6),
- (partially) the front section of the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting) (66A, Window sealing),
- (partially) the front section of the rear side door exterior weatherstrip (see Rear side door exterior weatherstrip: Removal - Refitting) (66A, Window sealing).

a. Remove:
- the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting) (66A, Window sealing),
- the fixed rear side door window (see 54A, Windows, Rear side door fixed window: Removal - Refitting, page 54A-11).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Strip off the side decorative strip using a hot air gun.

Note: Once removed, the side decorative strips cannot be refitted and must be replaced each time.

B85 or K85

Note: The removal operation is identical for the rear side decorative strip.
EXTERIOR EQUIPMENT
Side decorative strips
Removal - Refitting

I - REFITTING PREPARATION OPERATION
a. Clean the adhesive surface of the film with HEP-TANE (see Vehicle: Parts and consumables for the repair) and wipe with a LINT-FREE CLOTH.

II - REFITTING OPERATION FOR PART CONCERNED
a. Offer up the decorative strip to be bonded to the door pillar and centre it visually over hole (1) and on the upper section of the upright (2).

a. Hold the lower section of the decorative strip in place with masking tape.

a. Turn back the top of the decorative strip and pull away the protective paper to mark (3).

a. Stick the decorative strip down taking care to keep it properly aligned.

a. Pull away the protective paper from the upper section of the decorative strip.

a. Stick down the upper section smoothing it with a plastic spatula from bottom to top in a continuous movement.

a. Pull away the masking tape from the lower section of the decorative strip.

a. Smooth from top to bottom with the plastic spatula in a continuous movement, gradually pulling away the protective paper following the progression of the bonding taking care to ensure that it stays aligned.

Note: Do not press too heavily on the plastic spatula otherwise you may stretch and deform the decorative side strip.
56A

- Side decorative strips: Removal - Refitting

1. Stick down the decorative strip to the two edges (4) and (5) using the plastic spatula.
2. Smooth edge (4) with a movement from the rear to the front ensuring that the decorative strip is properly bonded on the run channel side.
3. Fold back edge (5) gradually over its entire length with the plastic spatula and finish the application with your thumb along the interior of the upright.

III - FINAL OPERATION.

1 - Front side door

a. Refit:
   - the front door glass run channel (see Front side door window run channel: Removal - Refitting)
   - the front door exterior weatherstrip (see Front side door exterior weatherstrip: Removal - Refitting)
   - the front sliding door window (see Front side door sliding window: Removal - Refitting)
   - the door mirror (see Exterior equipment, Door mirror: Removal - Refitting)
   - the front door trim (see Front side door trim: Removal - Refitting)

2 - Rear side door

a. Refit:
   - the rear side door exterior weatherstrip (see Rear side door exterior weatherstrip: Removal - Refitting)
   - the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting)

b. Refit:
   - the fixed rear side door window (see Rear side door fixed window: Removal - Refitting)
   - the rear side door glass run channel (see Rear side door window run channel: Removal - Refitting)

2. Refit:
   - the rear side door sliding window (see Rear side door sliding window: Removal - Refitting)
   - the rear side door trim (see Rear side door trim: Removal - Refitting)

Note: The procedure for fitting the decorative strip on the rear side door is identical.

- B85 or K85
EXTERIOR EQUIPMENT

Rear badges: Removal - Refitting

I - CONSTRUCTOR'S BADGE

1. REMOVAL PREPARATION OPERATION
   a. Remove the tailgate trim (see Tailgate trim: Removal - Refitting) (MR 393, 73A, Non-side opening element trim).

2. OPERATION FOR REMOVAL OF PART CONCERNED
   a. Unclip the constructor's badge.
   a. Unclip the constructor's badge mounting, via the inside of the tailgate box.

3. REFITTING OPERATION FOR PART CONCERNED
   a. Clip on:
      - the badge mounting,
      - the constructor's badge.

4. FINAL OPERATION
   a. Refit the tailgate trim (see Tailgate trim: Removal - Refitting) (MR 393, 73A, Non-side opening element trim).

II - VEHICLE BADGE

1. FITTING PREPARATION OPERATION
   a. Clean the adhesive surface of the vehicle badge with a lint-free cloth soaked in heptane.
   a. Wipe the adhesive surface of the vehicle badge with a clean, dry cloth soaked in heptane.

2. FITTING
   a. "CLIO" badge
      a. Remove the protective paper from the back of the vehicle badge.
      a. Position the template/badge assembly.
      a. Stick on the vehicle badge.
      a. Remove the template.

---

---
RENAULT badge

- Remove the protective paper from the back of the vehicle badge.
- Position the template/badge assembly:
  - (X1) 15 mm
  - (X2) 7 mm
  - (X3) 32 mm

- Stick on the vehicle badge.
- Remove the template.

RENAULT SPORT badge

- Remove the protective paper from the back of the vehicle badge.
- Position the template/badge assembly:
  - (X4) 12 mm
  - (X5) 6 mm
  - (X6) 20 mm

- Stick on the vehicle badge.
- Remove the template.
EXTERIOR EQUIPMENT
Roof bar: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED

a Remove the trims (1) from the roof bar at (2).

b Remove:
- the roof bar bolts (3),
- the roof bar nuts (4),
- the roof bar.

REFITTING
I - REFITTING PREPARATION OPERATION

a Check the condition and cleanliness of:
- the roof bar,
- the roof,
- the roof bar support plates (replace if necessary).

II - REFITTING OPERATION FOR PART CONCERNED

a Refit the roof bar.

a Torque tighten:
- the roof bar bolts (8 N.m) (3),
- the roof bar nuts (8 N.m) (4).

a Refit the roof bar trims.

Tightening torques:
m roof bar bolts 8 N.m
m roof bar nuts 8 N.m

# Exterior Equipment

## Front Wing Air Extraction Grille: Removal - Refitting

### C85, and Equipment Level Sport

### Removal

**I - Removal Preparation Operation**
- Remove the wheel arch liner from the side in question (see 55A, Exterior Protection, Front Wheel Arch Liner: Removal - Refitting, page 55A-41).

**II - Operation for Removal of Part Concerned**
- Remove:
  - The washers (1),
  - The front wing air extraction grille.

### Refitting

**I - Refitting Preparation Operation**
- Check the condition of the washers (1); replace them if necessary.

**II - Refitting Operation for Part Concerned**
- Refit:
  - The front wing air extraction grille,
  - The washers (1).

**III - Final Operation**
EXTERIOR EQUIPMENT
Sill panel extension: Removal - Refitting

EQUIPMENT LEVEL EAC or EQUIPMENT LEVEL SPORT

REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a Remove the bolts (1).

a Detach the decorative strip (2).

a Remove the bolts (3).

a Detach the double-sided tape (4) using the Car. 1363.

a Unclip the sill panel extender (5).

REFITTING

I - REFITTING PREPARATION OPERATION

a Check the condition of the clips, replace them if necessary.

a Position the sill panel extender clips.

a Clean the bonding zone of the decorative strip and double-sided tape with HEPTANE using a LINT-FREE CLOTH (see Vehicle: Parts and consumables for the repair) (04B, Consumables - Products).

Special tooling required

Car. 1363
Set of trim removal levers.

Note:
Replace the decorative strip (2) every time it is removed.
EXTERIOR EQUIPMENT
Sill panel extension: Removal - Refitting

EQUIPMENT LEVEL EAC or EQUIPMENT LEVEL SPORT

a Bond the double-sided tape in place.

II - REFITTING OPERATION FOR PART CONCERNED

a Refit:
- the sill panel extender,
- the bolts (3) and (1).

a Attach a new decorative strip.
EXTERIOR EQUIPMENT
Sill panel extender: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION
1 - Sill panel extender
   - Protect the wing using masking tape.
2 - Sill panel extender mounting
   - Position the vehicle on a two-post lift (see Vehicle: Towing and lifting (02A, Lifting equipment)).
   - Remove:
     - the front wheel (see Wheel: Removal - Refitting (35A, Wheels and tyres)),
     - the front wheel arch liner (see Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41).

II - OPERATION FOR REMOVAL OF PART CONCERNED
1 - Sill panel extender
   - Remove the bolt (1). [Special tooling required: Car. 1363 Set of trim removal levers.]
   - Unclip the sill panel extender front section at (2) using the (Car. 1363).
   - Remove the sill panel extender front section (3).
   - Remove:
     - the plastic rivet (4),
     - the bolt (5).
EXTERIOR EQUIPMENT

Sill panel extension: Removal - Refitting

**EQUIPMENT LEVEL EAG**

- **Removal**
  - Unclip the sill panel extender at (6) using the tool (Car. 1363).
  - Remove the sill panel extender (7).
  - Remove nuts (8).
  - Drill out the rivets (9).
  - Remove the sill panel extender mounting.
  - Retrieve the rivet shanks.

**REFITTING**

**I - REFITTING PREPARATION OPERATION**

- Always replace the rivets of the sill panel extender mounting.

**II - REFITTING OPERATION FOR PART CONCERNED**

**1 - Sill panel extender mounting**

- Refit the sill panel extender mounting.
- Centre the sill panel extender mounting on the studs.
- Refit the nuts (8), without tightening them.

**Note:**

Hold the rivet shanks using pliers, in order to avoid any deformation of the holes in the front wing.
EXTERIOR EQUIPMENT
Sill panel extender: Removal - Refitting

EQUIPMENT LEVEL EAG

56A

a Check the dimension (10) = 9.5 mm between the defined line and the upper edge of the sill panel extender mounting at (10).

a Tighten the nuts (8).

a Fit new rivets.

2 - Sill panel extender

a Refit the sill panel extender.

a Clip the sill panel extender.

a Refit:
   - the bolt (5),
   - the plastic rivet (4),
   - the sill panel extender front section.

a Clip on the sill panel extender front section.

a Refit the bolt (1).

III - FINAL OPERATION

1 - Sill panel extender mounting

a Refit:
   - the front wheel arch liner (see 55A, Exterior protection, Front wheel arch liner: Removal - Refitting, page 55A-41),
   - the front wheel (see Wheel: Removal - Refitting (35A, Wheels and tyres).

2 - Sill panel extender

a Remove the masking tape from the front wing.
REMOVAL

I - REMOVAL PREPARATION OPERATION

a Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (88C, Airbag and pretensioners)).

a Disconnect the battery (see Battery: Removal - Refitting (80A, Battery)).

a Position the steering column in the low position.

a Remove:
  - the driver's front airbag (see Driver's frontal airbag: Removal - Refitting (88C, Airbag and pretensioners)),
  - the steering wheel (see Steering wheel: Removal - Refitting (36A, Steering assembly)).

a Partially remove the seal (1). 

Special tooling required
Car. 1363 Set of trim removal levers.

Equipment required Diagnostic tool

Tightening torques:
Passenger front airbag bolts on the dashboard cross member 8 N.m

IMPORTANT
To avoid all risk of damage to the systems, apply the safety and cleanliness instructions and operation recommendations before carrying out any repair:
- (see Airbag and pretensioners: Precautions for the repair (88C, Airbag and pretensioners)),
- (see Vehicle: Precautions for the repair (01D, Mechanical introduction)).

IMPORTANT
To avoid any risk of triggering when working on or near a pyrotechnic component (airbags or pretensioners), lock the airbag computer using the diagnostic tool.

When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel lights up continuously (ignition on).

IMPORTANT
Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
Dashboard: Removal - Refitting

- Remove the side panel (2) using the tool (Car. 1363).
- Unclip the soundproofing material (3).
- Remove the soundproofing material.
- Remove the bolt (4).
- Unclip the trim (5) using the tool (Car. 1363).
- Remove:
  - the dashboard lower trim bolt (6),
  - the plastic rivet (7) of the dashboard lower trim.
Dashboard: Removal - Refitting

- Remove the dashboard lower trim (8).
- Disconnect the switch plate connectors (depending on equipment level).
- Remove the bolts (9) from the shells under the steering wheel.
- Unclip the cowlings under the steering wheel.
- Unclip the upper cowling (10) from the dashboard gaiter.

Remove:
- the cowlings under the steering wheel,
- the steering column switch assembly (see Steering column switch assembly: Removal - Refitting) (84A, Control - Signals),
- the instrument panel (see Instrument panel: Removal - Refitting) (83A, Instrument panel).

Remove:
- the bolt (11),
- the centre console (see Interior equipment, Centre console: Removal - Refitting, page 57A-14).
a Unclip the lower centre trim at (12) and (13).

a Disconnect the offset multimedia socket connectors.

a Disconnect the offset audio socket connector.

a Remove the radio navigation system (see Radio navigation: Removal - Refitting) (83C, On-board telematics system).

a Remove the radio (see Radio: Removal - Refitting) (86A, Radio).

a Remove:
- the centre front panel (see 57A, Interior equipment, Centre front panel: Removal - Refitting, page 57A-19),
- the control panel (see Control panel: Removal - Refitting) (61A, Heating).

a Remove the offset multimedia socket computer (see Offset multimedia socket computer: Removal - Refitting) (86A, Radio).

a Remove the bolts (14).

a Remove:
- the card reader (see Card reader: Removal - Refitting) (82A, Immo.),
- the dashboard starter aerial (see Starting aerial: Removal - Refitting) (82A, Immobiliser).

a Remove the display (see Display: Removal - Refitting) (86A, Radio).
INTERIOR EQUIPMENT
Dashboard: Removal - Refitting

- Remove the bolt (15).
- Remove the solar radiation sensor (see Solar radiation sensor: Removal - Refitting) (61A, Heating system).
- Remove:
  - the tweeters (see Tweeter: Removal - Refitting) (86A, Radio),
  - the windscreen pillar trims (see Windscreen pillar trim: Removal - Refitting) (71A, Body internal trim),
  - the inhibitor switch (see Inhibitor switch: Removal - Refitting) (88C, Airbag and pretensioners),
  - the glovebox (see 57A, Interior equipment, Glovebox: Removal - Refitting, page 57A-16).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove the passenger front airbag bolts (16) from the dashboard cross member (under the dashboard).
- Unlock the passenger front airbag connectors at (17).
- Disconnect the passenger front airbag connectors (18).

112395
CLIMATE CONTROL
112398
101920
Dashboard: Removal - Refitting

**REMOVING**

- a) Remove the bolts (19) from each side of the vehicle.

- a) Mark the wiring routing.

- a) Take out the dashboard.

**REFITTING**

**I - REFITTING PREPARATION OPERATION**

- Ensure that the wiring is in good condition.

**II - REFITTING OPERATION FOR PART CONCERNED**

- a) Refit the dashboard.

- a) Position the wiring in place before fully refitting the dashboard.

- a) Refit the bolts (20) on each side of the vehicle.

- a) Connect the passenger front airbag connectors.

- a) Lock the passenger's front airbag connectors.

**WARNING**

To prevent any risk of noise, premature wear, short circuits, etc. after the refitting operation, mark the wiring routing and how to connect the connectors.

**Note:**

This operation requires two people.

**WARNING**

To prevent damage to the wiring harness when refitting, observe the original routing.

**WARNING**

To guarantee a good electrical connection, make sure that the wiring does not place any stress on the connectors or the surrounding components.

**Note:**

This operation requires two people.
Dashboard: Removal - Refitting

- Torque tighten the passenger front airbag bolts on the dashboard cross member (8 N.m), (21).

III - FINAL OPERATION

- Refit:
  - the glovebox (see Interior equipment, Glovebox: Removal - Refitting, page 57A-16),
  - the inhibitor switch (see Inhibitor switch: Removal - Refitting) (88C, Airbag and pretensioners),
  - the windscreen pillar trims (see Windscreen pillar trim: Removal - Refitting) (71A, Body internal trim),
  - the tweeters (see Tweeter: Removal - Refitting) (86A, Radio).

- Refit the solar radiation sensor (see Solar radiation sensor: Removal - Refitting) (61A, Heating system).

- Refit:
  - the bolt (22),
  - the display (see Display: Removal - Refitting) (86A, Radio).

- Refit the bolts (23).
a Refit the offset multimedia socket computer (see Offset multimedia socket computer: Removal - Refitting) (86A, Radio).

a Refit the control panel (see Control panel: Removal - Refitting) (61A, Heating).

a Refit:
- the dashboard starter aerial (see Starting aerial: Removal - Refitting) (82A, Immobiliser),
- the card reader (see Card reader: Removal - Refitting) (82A, Immobiliser).

a Refit the centre front panel (see 57A, Interior equipment, Centre front panel: Removal - Refitting, page 57A-19).

a Refit the radio (see Radio: Removal - Refitting) (86A, Radio).

a Refit the radio navigation system (see Radio navigation: Removal - Refitting) (83C, On board telematics system).

a Refit the centre console (see 57A, Interior equipment, Centre console: Removal - Refitting, page 57A-14).

a Refit:
- the bolt (24),
- the instrument panel (see Instrument panel: Removal - Refitting) (83A, Instrument panel),
- the steering column switch assembly (see Steering column switch assembly: Removal - Refitting) (84A, Control - Signals).

a Clip:
- the dashboard gaiter on the upper cowling,
- the cowlings under the steering wheel.

a Refit the bolts to the shells under the steering wheel.
Dashboard: Removal - Refitting

- Fit the dashboard lower trim (25).
- Connect the switch plate connectors (depending on equipment level).
- Clip on the dashboard lower trim.
- Refit:
  - the dashboard lower trim bolt (26),
  - the plastic rivet (27) of the dashboard lower trim.
- Clip the trim piece in place (28).
- Refit the bolt (29).
- Clip on the side panel (30).
- Refit the seal (31).
- Refit:
  - the soundproofing (32),
  - the steering wheel (see Steering wheel: Removal - Refitting (36A, Steering assembly),
  - the driver's front airbag (see Driver's frontal airbag: Removal - Refitting (88C, Airbags and pretensioners).
- Connect the battery (see Battery: Removal - Refitting (80A, Battery).
- Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (88C, Airbag and pretensioners).
- Carry out a function test on all functions.
STRIPPING
I - STRIPPING PREPARATION OPERATION

a Lock the airbag computer using the Diagnostic tool
(see Fault finding - Replacement of components (88C, Airbag and pretensioners)).

a Disconnect the battery (see Battery: Removal - Refitting (80A, Battery)).

a Remove the dashboard (see 57A, Interior equipment, Dashboard: Removal - Refitting, page 57A-1).

II - STRIPPING OPERATION FOR PART CONCERNED

a Remove:
- the dashboard air vents (see 57A, Interior equipment, Dashboard air vent: Removal - Refitting, page 57A-12),
- the passenger front airbag of the dashboard (see Passenger's frontal airbag: Removal - Refitting).

REBUILDING
I - REBUILDING OPERATION FOR PART CONCERNED

a Refit:
- the passenger front airbag of the dashboard (see Passenger's frontal airbag: Removal - Refitting)
(88C, Airbag and pretensioners),
- the dashboard air vents (see 57A, Interior equipment, Dashboard air vent: Removal - Refitting, page 57A-12).

II - FINAL OPERATION

a Refit the dashboard (see 57A, Interior equipment, Dashboard: Removal - Refitting, page 57A-1).

a Connect the battery (see Battery: Removal - Refitting).

a Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (88C, Airbags and pretensioners)).

IMPORTANT
To avoid all risk of damage to the systems, apply the safety and cleanliness instructions and operation recommendations before carrying out any repair:
- (see Airbag and pretensioners: Precautions for the repair (88C, Airbags and pretensioners),
- (see Vehicle: Precautions for the repair (01D, Mechanical introduction).

IMPORTANT
To avoid any risk of triggering when working on or near a pyrotechnic component (airbags or pretensioners), lock the airbag computer using the diagnostic tool.

When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel lights up continuously (ignition on).

IMPORTANT
Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
CONVERSION PREPARATION OPERATION

Remove the glovebox (see 57A, Interior equipment, Glovebox: Removal - Refitting, page 57A-16).

CONVERSION

1 - Mounting holes for the offset audio socket unit

a) For positioning the holes, use the offset audio socket unit (1).

\[(X1) = 210 \text{ mm}\]
\[(X2) = 15 \text{ mm}\]

b) Drill the holes using a drill bit (\(\phi 3 \text{ mm}\)).

2 - Hole for offset audio socket unit harness run

a) Make the conversion using a conical cutter or special tool (part no: 77 11 419 232).

\[(X3) = 15 \text{ mm}\]
\[(X4) = 30 \text{ mm}\]

b) Drill hole diameter 20 mm.

FINAL OPERATION.

Refit the glovebox (see 57A, Interior equipment, Glovebox: Removal - Refitting, page 57A-16).
REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Protect the dashboard around the air vents using masking tape.

II - OPERATION FOR REMOVAL OF PART CONCERNED

1 - Dashboard centre air vent

a. Unclip the air vent using tool Car. 1597.

Special tooling required

Car. 1597
Trim removal lever.
INTERIOR EQUIPMENT
Dashboard air vent: Removal - Refitting

2 - Dashboard side air vent

a) Unclip the air vent using tool Car. 1597.

REFITTING

REFITTING OPERATION FOR PART CONCERNED

a) Clip on the air vents in the correct position.
INTERIOR EQUIPMENT
Centre console: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a. Remove the trim (1).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a. Unclip the gear lever trim.
a. Push the seats forward as far as possible.
a. Remove the bolts (2).

III - REFITTING OPERATION FOR PART CONCERNED
a. Refit:
   - the centre console,
INTERIOR EQUIPMENT
Centre console: Removal - Refitting

IV - FINAL OPERATION.
- Clip on the gear lever trim, the trim (1).

- Remove the bolts (3) and (2).
I - REMOVAL PREPARATION OPERATION

a. Remove the driving school electric control unit (see Driving school repeater electrical control unit: Removal - Refitting) (MR 392, 84A, Control - Signals).

2. Partially remove seal (1).
3. Unclip the side panel (2).
4. Disconnect the connector.
5. Remove the bolt (3).
6. Unclip the trim (4).

II - OPERATION FOR REMOVAL OF PART CONCERNED

7. Remove the bolts (5).
8. Remove the bolt (6).
INTERIOR EQUIPMENT
Glovebox: Removal - Refitting

REMOVAL
1. Take out the glovebox.
2. Disconnect the connector.

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED
1. Refit the glovebox.
2. Refit the bolts (7) and (8).

II - FINAL OPERATION
1. Clip the trim piece in place.
Glovebox: Removal - Refitting

Refit:
- the bolt (9),
- the side panel,
- the seal (10).

Refit the driving school electric control unit (see Driving school repeater electrical control unit: Removal - Refitting (MR 392, 84A, Controls)).
INTERIOR EQUIPMENT
Centre front panel: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATIONS

a. Remove:
   - the centre console (see 57A, Interior equipment, Centre console: Removal - Refitting, page 57A-14),
   - the radio and/or the navigation system (see Radio: Removal - Refitting) (MR 392, 86A, Radio) or (see Radio navigation: Removal - Refitting) (MR 392, 83C, On-Board Telematics System).

   a. Unclip the lower trim (1) and (2).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Unclip the centre front panel (3) and (4).

a. Disconnect the connectors.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Connect the connectors.

a. Clip in the centre front panel.

112366
112389
112390
INTERIOR EQUIPMENT
Centre front panel: Removal - Refitting

II - FINAL OPERATION.

a Refit:
- the lower trim,
- the radio and/or the navigation system (see Radio: Removal - Refitting (MR 392, 86A, Radio) or (see Radio navigation: Removal - Refitting (MR 392, 83C, On-Board Telematics System),
- the centre console (see Interior equipment, Centre console: Removal - Refitting, page 57A-14).
INTERIOR EQUIPMENT
Interior rear-view mirror: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERNED
- Unclip:
  - the upper cover,
  - the lower cover.
- Disconnect the connectors.
- Remove the rear view mirror.

REFITTING
REFITTING OPERATION FOR PART CONCERNED
- Refit the rear view mirror.
- Connect the connectors.
- Clip:
  - the lower cover,
  - the upper cover.

Note: When removing the rear view mirror, be careful not to damage the rain sensor nearby.
INTERIOR EQUIPMENT
Sun visor: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
a Unclip the cover (1) in the slit at (2).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Press on the clip (3) using the tool (Car. 1597) at (4) to unlock the sun visor.
a Tilt the sun visor at (5).
a Remove the sun visor.

Special tooling required
Car. 1597 Trim removal lever.
INTERIOR EQUIPMENT
Sun visor: Removal - Refitting

a Unclip the cover of the sun visor central support by pressing the tab (6).

a Remove the sun visor central support using the (Car. 1597).

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED

a - Clip:  
- the central sun visor support.  
- the cover of the sun visor central support,  
- the sun visor.

II - FINAL OPERATION

a Clip the cover on.

112560
INTERIOR EQUIPMENT

Grab handle: Removal - Refitting

REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a) Unclip the pins (1) without removing them, using the Car. 1597.

a) Remove the grab handle or the glasses holder.

REFITTING

REFITTING OPERATION FOR PART CONCERNED

a) Refit the grab handle.

a) Clip on the pins (1).

Special tooling required
Car. 1597: Trim removal lever.

100183
REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a) Unclip the side trims (1).

b) Unclip the rear parcel shelf sun blind (2) and (3).

c) Remove the rear parcel shelf sun blind.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a) Position the rear parcel shelf sun blind.

b) Clip the rear parcel shelf blind into place.

c) Refit the side trim pieces (1).

II - FINAL OPERATION

a) Carry out a function test.
INTERIOR EQUIPMENT
Dashboard cover gaiter: Removal - Refitting

I - REMOVAL PREPARATION OPERATION

- Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbag and pretensioner)).
- Disconnect the battery (see Battery: Removal - Re-fitting (MR 392, 80A, Battery)).
- Lock the steering column in the low position.
- Remove:
  - the driver's front airbag (see Driver's frontal airbag: Removal - Refitting (MR 392, 88C, Airbag and pretensioners),
  - the steering wheel (see Steering wheel: Removal - Refitting (MR 392, 36A, Power-assisted steering).

IMPORTANT
Before carrying out any work on or near a safety system component, lock the airbag computer using the Diagnostic tool. When this function is activated, all the trigger lines are disabled and the airbag instrument panel warning light is lit when the ignition is switched on.

IMPORTANT
Handling the pyrotechnic systems (airbags and pretensioners) near to a heat source or flame is prohibited: there is a risk of triggering the airbags or pretensioners.
Dashboard cover gaiter: Removal - Refitting

- Remove the bolt (3).
- Unclip the trim (4).
- Remove the bolts (5).
- Remove the lower cover (6).
- Disconnect the connector (depending on equipment level).
- Remove the bolts (7) under the lower half-cover.
- Unclip the lower and upper covers.
- Unclip the upper cover (8).
- Remove the covers.
- Remove the steering column assembly (see Steering column switch assembly: Removal - Refitting) (MR 392, 84A, Control - Signals).
INTERIOR EQUIPMENT
Dashboard cover gaiter Removal - Refitting

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove the cover gaiter.

a. Remove the steering column mounting bolts (9) on the cross member.

a. Remove the steering column from the pre-supports (10) to set it down on the shim.

a. Grind off brazing residues (11) .

REFITTING

I - REFITTING PREPARATION OPERATION

a. Remove grease from the mating surface with heptane and a lint-free cloth.

Note: Place a block of approximately 20 cm on the floor beneath the column to support it.

113345
113347
**Dashboard cover gaiter: Removal - Refitting**

**II - REFITTING OPERATION FOR PART CONCERNED**

- Take off the Velcro strip protection (12).
- Attach the gaiter, starting in the middle.
- Check that there is a good bond and that the Velcro strips are in the correct position (13).

**III - FINAL OPERATION**

- Refit the steering column in the retainers.
- Torque tighten the steering column mounting bolts (21 Nm).
- Refit the steering column assembly (see Steering column switch assembly: Removal - Refitting (MR 392, 84A, Control - Signals)).
- Clip on the lower and upper covers.
Connect the connectors.

Refit:
- the lower cover (14),
- the bolts (15).

Clip the trim piece in place (16).

Refit the bolt (17).

Clip on the side panel.

Refit the seal.

Refit:
- the steering wheel (see Steering wheel: Removal - Refitting) (MR 392, 36A, Power-assisted steering),
- the driver's front airbag (see Driver's frontal airbag: Removal - Refitting) (MR 392, 88C, Airbags and seat belt pretensioners).

Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbag and pretensioners).
INTERIOR EQUIPMENT
Separation components: Removal - Refitting

REMOVAL
OPERATION FOR REMOVAL OF PART CONCERED

a
Remove:
- the bolts (1),
- the separation component.

REFITTING
OPERATION FOR PART CONCERED

a
Refit:
- the separation component,
- the bolts (1).

a
Torque tighten the separation component bolts (8 Nm).

Tightening torques
separation component bolts 8 Nm
I - REMOVAL PREPARATION OPERATION

a Lock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbags and pretensioners)).

b Disconnect the battery (see Battery: Removal - Refitting (MR 392, 80A, Battery)).

c Detach the seat belt by undoing bolt (1).

d Remove the B-pillar lower trim (see B-pillar trim: Removal - Refitting (MR 393, 71A, Body internal trim)).

e Remove the complete rear bench seat (depending on the version):
   - (see Single unit rear bench seat base: Removal - Refitting (MR 393, 76A, Rear seat frames and runners)),
   - (see Single unit rear bench seatback: Removal - Refitting (MR 393, 76A, Rear seat frames and runners)),
   - (see 1/3 and 2/3 rear bench seat base: Removal - Refitting (MR 393, 76A, Rear seat frames and runners)),
   - (see 1/3 and 2/3 rear bench seatback: Removal - Refitting (MR 393, 76A, Rear seat frames and runners)).
Front seat belt: Removal - Refitting

- Remove the bolt (2).
- Remove the seat belt mounting (3).
- Remove the rear panel trim (see Rear panel lining: Removal - Refitting) (MR 393, 71A, Body internal trim).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove the cover and bolt (4).
SAFETY ACCESSORIES
Front seat belt: Removal - Refitting

- Remove the cover and bolt (5).
- Disconnect the connector.
- Remove the bolt (6).
- Remove the belt.

REFITTING

- Refit the seat belt (3).
- Torque tighten the seat belt bolt (23 Nm) (7).
- Connect the connectors.
SAFETY ACCESSORIES
Front seat belt: Removal - Refitting

1. Torque tighten the seat belt bolt (23 Nm) (8).
2. Refit the cover.

1. Torque tighten the seat belt bolt (23 Nm) (9).
2. Refit the cover.

---

Page 4
SAFETY ACCESSORIES

Front seat belt: Removal - Refitting

- Refit:
  - the rear wing panel trim (see Rear panel lining: Removal - Refitting) (MR 393, 71A, Body internal trim),
  - the seat belt mounting (3).

- Refit the complete rear bench seat (depending on the version):
  - (see Single unit rear bench seatback: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners),
  - (see Single unit rear bench seat base: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners),
  - (see 1/3 and 2/3 rear bench seatback: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners),
  - (see 1/3 and 2/3 rear bench seat base: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners).

- Torque tighten the seat belt mounting bolts (23 Nm) (3).

- Clip on the B-pillar lower trim (see B-pillar trim: Removal - Refitting) (MR 393, 71A, Body internal trim).

- Fix the seat belt (1) back onto the seat.

- Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

- Unlock the airbag computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbags and pretensioners).
SAFETY ACCESSORIES
Rear side seat belt: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION
- Lock the computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbags and pretensioners).
- Disconnect the battery (see Battery: Removal - Re-fitting (MR 392, 80A, Battery).
- Remove the rear bench seat (see Single unit rear bench seatback: Removal - Refitting (MR 393, 76A, Rear seat frames and runners).
- Unclip the rear wing panel trim (see Rear panel lining: Removal - Refitting (MR 393, 71A, Body internal trim).
- Remove the rear door sill upper lining (see Rear inner sill upper trim: Removal - Refitting (MR 393, 71A, Body internal trim).

II - OPERATION FOR REMOVAL OF PART CONCERNED
- Remove:
  - the seat belt lower mounting bolt (1) ,
  - the rear quarter panel trim (see Quarter panel trim: Removal - Refitting (MR 393, 71A, Body internal trim).

Equipment required
Diagnostic tool

Tightening torques
m seat belt inertia reel mounting bolt 21 Nm
m seat belt return mechanism mounting bolt 21 Nm
m seat belt lower mounting bolt 21 Nm

IMPORTANT
Before doing any work on a safety system component, always lock the airbag computer using the Diagnostic tool. When this function is activated, all the trigger lines are disabled and the airbag instrument panel warning light is continuously lit (with the ignition on).

IMPORTANT
Handling the pyrotechnic systems (airbags and pretensioners) near to a heat source or flame is prohibited: there is a risk of triggering the airbags or pretensioners.

IMPORTANT
For replacing safety components following an impact (see Airbags and pretensioners: Precautions for the repair (MR 392, 88C, Airbags and pretensioners).
SAFETY ACCESSORIES

Rear side seat belt: Removal - Refitting

- a) Remove the seat belt return mechanism mounting bolt (2).
- b) Pull the inner trim away from the rear wheel arch.
- c) Remove the seat belt inertia reel unit mounting bolt (3).
- d) Disconnect the connector.
- e) Remove the inertia reel.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED
- a) Refit the seat belt inertia reel.
- b) Reconnect the connector.
- c) Torque tighten the seat belt inertia reel mounting bolt (21 Nm).
- d) Refit the upper seat belt return mechanism.
- e) Torque tighten the seat belt return mechanism mounting bolt (21 Nm).
- f) Refit the rear quarter panel trim (see Quarter panel trim: Removal - Refitting) (MR 393, 71A, Body internal trim).
- g) Torque tighten the seat belt lower mounting bolt (21 Nm).

II - FINAL OPERATION
- a) Refit the rear door sill upper lining (see Rear inner sill upper trim: Removal - Refitting) (MR 393, 71A, Body internal trim).
- b) Reattach the rear wing panel trim (see Rear panel lining: Removal - Refitting) (MR 393, 71A, Body internal trim).
- c) Refit the rear bench seat (see Single unit rear bench seatback: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners).
- d) Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).
- e) Unlock the computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbags and pretensioners).
SAFETY ACCESSORIES

Rear centre seat belt: Removal - Refitting

I - REMOVAL PREPARATION OPERATION

- Lock the computer using the Diagnostic tool (see Fault finding - Replacement of components (MR 394, 88C, Airbags and pretensioners)).
- Disconnect the battery (see Battery: Removal - Re- (MR 392, 80A, Battery)).
- Remove the rear bench seat (see Single unit rear bench seatback: Removal - Refitting (MR 393, 76A, Rear seat frames and runners)).
- Unclip the rear wing panel trim (see Rear lining: Removal - Refitting (MR 393, 71A, Body internal trim)).
- Remove the rear door sill upper lining (see Rear inner sill upper trim: Removal - Refitting (MR 393, 71A, Body internal trim)).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove central seat belt upper mounting bolt (1).
- Unclip the rear quarter panel trim (see Quarter panel trim: Removal - Refitting (MR 393, 71A, Body internal trim)).

IMPORTANT

Before doing any work on a safety system component, always lock the airbag computer using the Diagnostic tool. When this function is activated, all the trigger lines are disabled and the airbag instrument panel warning light is continuously lit (with the ignition on).

IMPORTANT

Handling the pyrotechnic systems (airbags and pretensioners) near to a heat source or flame is prohibited: there is a risk of triggering the airbags or pretensioners.

IMPORTANT

For replacing safety components following an impact (see Airbags and pretensioners: Precautions for the repair (MR 392, 88C, Airbags and pretensioners)).
SAFETY ACCESSORIES

Rear centre seat belt: Removal - Refitting

- Remove the plug (2).
- Remove the central seat belt upper mounting bolt.
- Remove the seat belt return mechanism mounting bolt (3).
- Remove the upper seat belt return mechanism.
- Remove seat belt inertia reel unit mounting bolt (4).
- Remove the inertia reel.

REFITTING

- Refit the seat belt inertia reel.
- Torque tighten the seat belt inertia reel mounting bolt (21 Nm).
- Refit the upper seat belt return mechanism.
- Torque tighten the seat belt return mechanism mounting bolt (21 Nm).
- Refit:
  - the plug (5),
  - the centre seat belt upper mounting bolt,
  - the rear quarter panel trim (see Quarter panel trim: Removal - Refitting (MR 393, 71A, Body internal trim)).
- Torque tighten the seat belt upper mounting bolt (21 Nm).

II - FINAL OPERATION.

- Refit the rear door sill upper lining (see Rear inner sill upper trim: Removal - Refitting (MR 393, 71A, Body internal trim)).
Rear centre seat belt: Removal - Refitting

Reattach the rear wing panel trim (see Rear panel lining: Removal - Refitting) (MR 393, 71A, Body internal trim).

Refit the rear bench seat (see Single unit rear bench seatback: Removal - Refitting) (MR 393, 76A, Rear seat frames and runners).

Connect the battery (see Battery: Removal - Refitting) (MR 392, 80A, Battery).

Unlock the computer using the Diagnostic tool (see Fault finding - Replacement of components) (MR 394, 88C, Airbags and pretensioners).
SAFETY ACCESSORIES
Front seat belt buckle: Removal - Refitting

REMOVAL

- Disconnect the connector (1).
- Unclip the wiring at (2).
- Remove bolt (3).
- Remove the flexible stalk.

REFITTING

- Refit the flexible stalk.
- Tighten to torque the flexible stalk mounting bolts (35 Nm), (4).
- Attach the wiring.
- Connect the connector.

Tightening torques:

- Flexible stalk mounting bolts: 35 Nm

Note:
You do not need to remove the seat in order to remove the front flexible stalk.
SAFETY ACCESSORIES
Rear seat belt buckle: Removal - Refitting

59A

REMOVAL
I - REMOVAL PREPARATION STAGE
a) Lift off the rear bench seat seat base.

II - REMOVAL STAGE OF PART IN QUESTION
a) Remove bolt (1).

a) Remove the flexible stalks.

REFITTING
I - REFITTING STAGE OF PART IN QUESTION
a) Refit the flexible stalks.

a) Tighten to torque the flexible stalk mounting bolts (21 Nm), (2).

II - FINAL STAGE
a) Reposition the seat base correctly.

Tightening torques for flexible stalk mounting bolts: 21 Nm.
REMOVAL
I - REMOVAL PREPARATION STAGE
a Remove:
- the front seat belt (see Front seat belt: Removal - Refitting, page 59A-1)
partially,
- the B-pillar lining (see B-pillar trim: Removal - Refitting).

II - REMOVAL STAGE OF PART IN QUESTION
a Remove bolt (1).

a Remove the adjusting device.

REFITTING
I - REFITTING STAGE OF PART IN QUESTION
a Refit the adjusting device.

a Tighten to torque the adjusting device mounting bolts (21 Nm), (2).
Seat height adjustment system: Removal - Refitting

II - FINAL STAGE

Refit:

- the B-pillar lining (see B-pillar trim: Removal - Refitting),
- the front seat belt (see 59A, Safety accessories, Front seat belt: Removal - Refitting, page 59A-1).

Refit:

- the B-pillar upper lining (see B-pillar upper trim: Removal - Refitting),
- the rear wing panel lining (see Rear panel lining: Removal - Refitting),
- the front seat belt (see 59A, Safety accessories, Front seat belt: Removal - Refitting, page 59A-1).
REMOVAL

I - REMOVAL PREPARATION OPERATION

a) Remove the door trim (see Front side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).

b) Open the access flap (1) according to the marking on the sealing film.

c) Remove the front door rubbing strip (see Exterior protection, Front side door protective strip: Removal - Refitting, page 55A-37).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a) Remove the bolt (2).

b) Unfasten clip (3).

c) Remove the door airbag module.

REFITTING

a) Refit:

- the door airbag module correctly,
- the bolt (2).
FINAL OPERATION.

a Close the door seal film (see Door sealing film: Removal - Refitting) (MR 393, 65A, Opening elements sealing).

a Refit the door trim (see Front side door trim: Removal - Refitting) (MR 393, 72A, Side opening element trim).
